Office Action Summary

Art Unit: 1647

***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 22-29, drawn to nucleic acids, classified in class 536, subclass 23.5, for example.

Group II. Claims 30-34, drawn to a method of detecting nucleic acids, classified in class 435, subclass 6, for example.

2. The inventions are distinct, each from the other because of the following reasons:

3. Groups I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)).

In the instant case, the nucleic acid of Group I can be used to make the protein as recited in claim 27 instead of being used to detect nucleic acids.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their separate classifications and because the literature

---

searches required for the inventions are not co-extensive and therefore references that would

anticipate one invention would not necessarily anticipate or even make obvious the other

invention, a search burden exists, and restriction for examination purposes as indicated is proper.

Furthermore, there are different issues for the search and examination of each, which would also be unduly burdensome.

Art Unit: 1647

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gucker whose telephone number is (703) 308-6571. The examiner can normally be reached on Monday to Friday from 0930 to 1800. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Kunz, can be reached on (703) 308-4623. The fax phone number for this Group is currently (703) 308-4242, but Applicant should confirm this by phoning the Examiner before faxing.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
